**Seb encountered problems from birth and was diagnosed with right sided hemiplegic together with breathing difficulties and other complications.**

His family started looking at local nurseries but none were suitable for his additional needs.

Then his Mum heard about White Lodge Centre and all the support services they provide. She now appreciates that Seb coming here was the best decision she has ever made.

The services and expertise of staff have transformed his life and he is now achieving amazing things that his family never thought would be possible. He can now climb the stairs, dress himself, write his name and even jump due to the progress made with his gross motor skills. *He couldn't do any of these things when he first came.*

"The support Seb and all the children that come to White Lodge Centre receive is exceptional"

The progress he has made has been unbelievable and this is due to the dedicated teams in the specialist nursery and children's therapy. Now Seb is one very happy boy who is always smiling.

**Please help us Spread More Smiles and support our life transforming specialist nursery and child therapy services.**
